

CAREGIVERS OF PERSONS WITH DEMENTIA NEEDED FOR TECHNOLOGY RESEARCH STUDY

We are looking for volunteers to take part in a research project that has the goal to create an online tool that connects family caregivers to resources they need to support themselves and an older person with dementia. The participants have to meet the following criteria:

be 18 years and older, be able to speak English fluently, and have at least one-year experience of caring for a family member (or a friend) with dementia who lives at home.

If you are interested and agree to participate you will be asked to: answer a short questionnaire and attend one focus group discussion to understand what you need in a technology that would support your caregiving.

Your participation would involve one session, which will be about 1-2 hours long.

In appreciation for your time, you will receive a monetary compensation and reimbursement for parking.
